

**OUR  
COOL  
STUFF  
MAKES  
YOUR  
COOL  
STUFF**

**FROM CONCEPTION  
TO PRODUCTION,  
OUR TEAM WILL  
GUIDE YOU.**

SWD Urethane is a family-owned company and has been manufacturing innovative polyurethane systems since 1972. We believe in creating strong partnerships with our customers through exceptional service and support.

**Unlike commodity suppliers, SWD Urethane has a team of sales representatives, chemists, and technicians ready to take customer's projects from conception to production regardless of project size.**

**SWD's team of sales representatives, chemists, and technicians will assist with:**

- Initial product development consultations
- Custom chemistry solutions
- Equipment and production line design
- Development of quality control measures
- Onsite technical service

# RIGID SYSTEMS

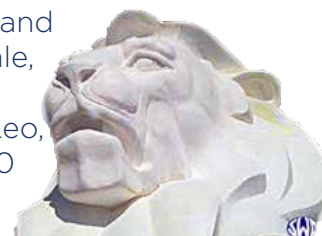

Our QUIKWORKS® two component rigid polyurethane systems have densities ranging from 0.4 pcf to 20 pcf. These systems can be customized in various densities and reactivity profiles.

QUIKWORKS® Rigid Polyurethane Systems are ideal for:

- Architectural Moldings
- Taxidermy
- Packaging Foam
- Insulated Panels
- Coolers
- And more

Created in 1997, the MGM's 'Grand Lion' was sculpted in Scottsdale, Arizona out of QUIKWORKS® Rigid Polyurethane Systems. Leo, the MGM Lion is 45 feet tall, 50 feet wide and weighs 50 tons.

# FLEXIBLE SYSTEMS

The QUIKWORKS® line of flexible polyurethane systems have a wide range of densities, firmnesses, and resiliencies. Custom formulations range from hypersoft flexible to semi rigid integral-skin foams.

QUIKWORKS® Flexible Polyurethane Systems are ideal for:

- Seats
- Archery Targets
- Footwear
- Novelties
- Medical and Sports Equipment
- And more

# ELASTOMER SYSTEMS

QUIKWORKS® polyurethane elastomers can be engineered with high load-bearing capabilities, as well as abrasion, impact, and tear resistance. Hardnesses can be formulated from Shore 00 to Shore D. Elastomers are an excellent replacement material for parts traditionally molded from plaster, rubber, or fiberglass, providing a cost-effective alternative for many applications.

## QUIKWORKS® Elastomers are ideal for:

- Footwear
- Tool Liner
- Concrete Form Liners
- Rollers
- And more

There are many advantages to working with SWD Urethane. As a family-owned company, we have the ability to work directly with you while eliminating the red tape prevalent in public companies. This allows us to turn custom products quickly.

SWD Urethane has an experienced research and development team that is dedicated to developing personalized solutions for our customers. We manufacture our own polyols, which enables wider design options and better control when customizing formulations. The SWD research and development team is capable of performing standard ASTM tests as well as other non-standard evaluations. Our various types of processing equipment also allow us to simulate real-world production, ensuring our team delivers accurate solutions.

We value the reputation of our products, which is why we have dedicated quality control chemists and support staff to ensure that your product will have the highest level of consistent quality. Our team will also work with you to renew/create an appropriate safety plan for handling and processing of all our products.

Overall, we are dedicated to help you make the best urethane systems for your products from conception to production. Contact us at 800-828-1394 or [marketing@swdurethane.com](mailto:marketing@swdurethane.com) for a product development consultation.
