

QUIK-SHIELD 104EZ

No Mix Open-Cell Foam

NO SHRINK, NO STINK

QUIK-SHIELD® 104EZ is an open-cell spray foam insulation that requires absolutely no mixing. It is ideal for high-performance and air barrier insulation applications in residential (IRC) and commercial (IBC) construction. QUIK-SHIELD® 104EZ is virtually odor-free and does not shrink, providing a consistent, seamless application.

This is a true no mix product, meaning it will always achieve optimal performance without mixing prior or during application. QUIK-SHIELD® 104EZ is easy-to-use and applicators do not have to worry about product dripping or pulling away from the studs.

I have sprayed over one hundred sets of QUIK-SHIELD® 104EZ and have enjoyed every single application. There is no dripping, it does not need a lot of heat to start spraying, and the product does not shrink or have odor. Depending on the application style requested, I can yield around 18,000 board feet.
